## FULL STACK WEB DEVELOPER

I was born in Africa and have lived in 6 countries prior to settling down in the northeast U.S. The common threads of my interests revolve around pushing boundaries and expanding comfort zones through high risk, creative, mental and physical activities while striving towards excellence and proficiency. The combination of my experiences travelling internationally, fearlessly pursuing new interests, and my solid work history has culminated in a well-rounded skillset that includes organization, perseverance, loyalty, tenacity, multi-cultural sensitivity, and creative problem solving.

## PROFESSIONAL EXPERIENCE

**OUT Maine** **Rockland, ME** **Mar 2021 – Apr 2021**

*Focused on supporting, educating, and empowering LGBTQ+ youth through building welcoming communities in Maine.*

### Developer – Capstone Project, Burlington Code Academy

Member of a 4-person team tasked with significant revamping of the online resource library, adding dynamic search capabilities, and creating an efficient resource management portal. Incorporated agile methodology, collaborative pair programming, and regular and frequent client check-ins.

- Interpreted client styling while introducing mobile responsiveness and accessibility
- Implemented Algolia framework to create faceted and open-text search capabilities rendering real-time, user-friendly results
- Created admin portal optimized with full CRUD functionality for straightforward resource management
- Participated in teamwide research to determine the optimal set of frameworks based on project objectives
- Organized daily stand-up meetings to manage versions and feature additions and maintain cohesive creative vision
- Technology used included a FERN Stack (Firebase, Express, React, Node.js), Algolia, CSS3, and GitHub

**Vermont Restaurants** **Richmond and Burlington, VT** **Sep 2016 – Current**

**Stone Corral Brewery, Richmond, VT**
